

Spectral CT 7500 system

The Philips Spectral CT 7500 allows you to experience spectral results 100% of the time. The advances of Spectral CT 7500 make operational workflow simple, helping you to achieve a precise diagnosis for every patient. Spectral CT 7500 builds on the established clinical and economic proof of spectral-detector CT in oncology and emergency radiology; opens new doors in interventional and radiation oncology; and now establishes the benchmark for cardiovascular spectral CT.

The Spectral CT 7500 was designed for first-time-right diagnosis and has proven operational efficiencies reducing the time to diagnosis and fewer repeat or follow-up scans.

Our EcoPassport

As a company committed to doing business sustainably, we are keen to help our customers make responsible choices. We offer solutions that improve people's health and well-being while reducing impact on the environment.

Our EcoPassports summarize the environmental benefits our products offer in one or more of our focal areas. For example, increased energy efficiency, more sustainable packaging, or a circular-ready product design; optimized for repair, refurbishing and recycling.

In this way, we want to help ensure that each purchase decision is the right one for our customer's needs *and* the planet.

Energy

- Ready to scan: 21 kW
- Standby mode: 6 kW
- On / Scan mode: up to 149 kW
- Energy usage/year¹: 43498 kWh

Packaging

- Total weight: 1227 kg

Weight

- Product: 4371 kg

Substances

- As per regulatory requirements:
- RoHS 2 compliant²
 - REACH compliant

Circularity

- Service & spare parts available
- Lifetime can be extended through our various software upgrades

¹average use scenario

²EU Directive 2011/65/EU plus amendment 2015/863
